Professional Summary

Highly motivated Bachelor of Science in Information Technology student at Mapúa Malayan Colleges Laguna with a cumulative GWA of 1.70, consistent Dean's Lister recognition, and a Full Academic Scholarship. Experienced in leading full-stack web and mobile application projects from system design through deployment, with strong proficiency in C#, .NET MAUI, ASP.NET Core Web API, SQL Server, JavaScript, Python, RESTful API development, cloud deployment, and systems integration. Demonstrated leadership through student organizations, research initiatives, and campus-wide events. Passionate about building scalable, user-centered software solutions and continuously expanding technical expertise in software engineering, cloud deployment, and information security.

Career Objective

To obtain an IT Internship where I can apply my knowledge in software engineering, full-stack development, database management, and project leadership while learning from industry professionals and contributing to the development of impactful software solutions. Available for internship beginning August 2027.

Personal Information

Full Name	Isaiah Andrei I. Noda	Nationality	Filipino
Date of Birth	August 13, 2005	Civil Status	Single
Address	739 Amil Compound, Magsaysay Rd., San Antonio, San Pedro, Laguna 4023	Internship Availability	Beginning August 2027
Academic Standing	Current cumulative GWA: 1.70; consistent Dean's Lister	Target Role	IT Internship / Software Development Internship

Education

Mapúa Malayan Colleges Laguna

Program	Bachelor of Science in Information Technology
Period	August 2024 - Expected Graduation: 2028
Current Cumulative GWA	1.70
Academic Achievements	Dean's Lister - 2nd Year, 3rd Trimester; Dean's Lister - 2nd Year, 2nd Trimester; Dean's Lister - 1st Year, 3rd Trimester; Full Academic Scholarship - 1st Year, 3rd Trimester; Dean's Lister - 1st Year, 2nd Trimester
Academic Performance	1st Year: 2.1 1.7 1.3; 2nd Year: 2.1 1.5 1.5
Relevant Coursework	Integrative Programming and Technologies; Web Systems and Technologies; Fundamentals of Database Systems; Information Assurance and Security; Networking and Communications / Data Communications; Object-Oriented Programming; Systems Analysis and Design; Software Engineering Concepts; Data Management and SQL Programming; Event-Driven Programming; Project Management

Lyceum of Alabang

Program	Information and Communications Technology (ICT)
Period	2022 - 2024
Honors	With Highest Honors - Grade 12; With High Honors - Grade 11

Amazing Grace School

Level	Nursery to Grade 10
Completion	Completed 2020

Technical Skills

Programming Languages	C#, VB.NET, C++, JavaScript, Python, SQL
Web Development	ASP.NET Core Web API, ASP.NET Web Forms (ASPX), Node.js, Express.js, EJS, HTML5, CSS3, Bootstrap, RESTful API development
Mobile Development	.NET MAUI, Android application development, real-time mobile communication using SignalR
Frameworks and Libraries	Entity Framework Core, SignalR, JWT Authentication, session-based authentication, Cloudinary SDK
Database Systems	Microsoft SQL Server, MySQL, Oracle Database, Microsoft Access, SQL Server

	Management Studio (SSMS)
APIs and Integrations	PayMongo Payment Gateway, Google Maps API, Cloudinary Media Storage, Gmail OTP / email verification systems, geolocation and spatial data handling with Azure SQL Geography
Cloud and Deployment	Azure SQL Database, Render Deployment, Ngrok tunneling, environment variable configuration, GitHub version control, Git-based collaborative development
Development Tools	Visual Studio 2022, Visual Studio Code, Postman, XAMPP, Git, GitHub, Oracle SQL tools, Figma, Microsoft Office Suite (Word, Excel, PowerPoint, Access)

Major Project Experience

BikeMate - Full-Stack Mobile Service Platform

Project Leader / Main Programmer | 2nd Year, 3rd Trimester (2026)

Led the development of a full-stack mobile application connecting cyclists with nearby mechanics and bike shops through real-time booking, emergency assistance, live location tracking, in-app messaging, and online payments. The system was designed to improve accessibility of roadside repair services and provide a scalable platform for both customers and service providers.

Technologies: .NET MAUI, ASP.NET Core Web API, SQL Server / Azure SQL, Entity Framework Core, SignalR, Google Maps API, PayMongo, Cloudinary, JWT Authentication, REST APIs

Key Responsibilities

- Designed the overall system architecture and database schema using SQL Server with spatial data support.
- Developed backend APIs for booking, user management, messaging, emergency services, and payment processing.
- Implemented real-time emergency alerts, notifications, and technician updates using SignalR.
- Integrated Google Maps for live tracking, route visualization, and location-aware service matching.
- Implemented PayMongo payment processing for service transactions.
- Configured Cloudinary media storage and coordinated module integration across customer, rider, and admin applications.
- Managed GitHub version control and coordinated development tasks across the team.

Notable Features

- Customer booking and service history
- Rider / technician job acceptance workflow
- Emergency beacon and SOS notification system
- Live location tracking
- In-app messaging architecture
- Admin dashboard and transaction verification
- OTP email verification and social login preparation

Mary Mother Mercy Legacy Website - CMS and Donation Platform

Project Leader / Main Programmer | 2nd Year, 3rd Trimester (2026)

Developed a content management system and online donation platform for Mary Mother of Mercy Home for the Elderly and Abandoned Foundation. The project focused on preserving the organization's history, managing content, and enabling secure online donations.

Technologies: Node.js, Express.js, EJS, MySQL, Cloudinary, PayMongo, Render Deployment, Session Authentication

Key Responsibilities

- Led system architecture and backend development.
- Built CMS modules for managing articles, announcements, historical content, and media uploads.
- Integrated PayMongo for online donations and payment processing in a test environment.
- Configured Cloudinary for image and media management.
- Configured deployment on Render and managed production environment variables.
- Assisted in database migration planning and production troubleshooting.

Notable Features

- Public-facing legacy website
- Secure admin CMS panel
- Donation management and payment tracking
- Media gallery
- Organization history archive
- Responsive design for mobile and desktop users

Smash-It Sports Reservation System

Project Leader / Main Programmer | 2nd Year, 2nd Trimester (2026)

Developed a web-based sports facility reservation and queue management system for badminton and pickleball courts. The system streamlined reservations, scheduling, payment processing, and real-time queue updates.

Technologies: ASP.NET Web Forms, SQL Server, SignalR, PayMongo, Bootstrap, Visual Studio 2022

Key Responsibilities

- Designed the reservation workflow, queue management logic, and database structure.
- Implemented real-time court availability and queue synchronization using SignalR.
- Integrated PayMongo for secure online reservation payments.
- Developed responsive user interfaces using Bootstrap.
- Led the team during system analysis, development, testing, integration, and presentation.

Notable Features

- Court reservation and scheduling
- Real-time reservation and queue updates
- Payment confirmation
- Admin reservation management
- User account management
- Reservation history and reporting

Gerodias Clinic Management System

Project Leader / Main Programmer | Grade 12 (2024)

Developed a desktop-based clinic management system for handling patient records, appointments, medical information, and basic clinic operations.

Technologies: VB.NET, SQL Server

Key Responsibilities

- Designed patient and appointment database tables.
- Developed CRUD operations for patient management.
- Implemented appointment scheduling and search functions.
- Created printable reports for clinic records.
- Built user-friendly desktop interfaces for clinic staff.

Guest Management System for Lamarea Executive Subdivision (HOA)

Project Leader / Main Programmer | Grade 11 (2023)

Developed a visitor and security monitoring system for residential subdivision operations to improve guest logging, visitor registration, and security reporting.

Technologies: Visual Basic, Microsoft Access

Key Responsibilities

- Designed the database for visitor information and entry logs.
- Developed guest registration and search modules.
- Implemented reporting features for security personnel.
- Led project documentation and final presentation.

Personal and Automation Projects

Calorie Tracker

Built a personal nutrition and calorie tracking application to monitor daily food intake, macronutrients, and fitness goals. The project was created to support personal health and fitness tracking.

Malaya Organization Automation System

Developed automation tools using JavaScript and Python to streamline administrative tasks for the Malaya organization.

- Attendance processing
- Data organization
- Form handling
- Report generation
- Message and workflow automation

Leadership Experience

President

Junior Information Systems Security Association (JISSA) | AY 2026 - 2027

- Leads the executive board and organization-wide initiatives.
- Oversees academic programs, technical events, and student engagement activities.
- Coordinates with faculty advisers and student leaders for organizational planning.
- Represents the organization in institutional activities and collaborations.

Research Chair

Junior Information Systems Security Association (JISSA) | AY 2025 - 2026

- Coordinated research-related activities and academic initiatives.
- Assisted students and members in research planning, documentation, and project development.
- Organized technical learning sessions and research discussions.

Events Committee Member

CCIS Student Council | AY 2024 - 2025

- Assisted in planning and executing college-wide events.
- Handled event logistics, coordination, and student engagement activities.

Education Committee Associate

CCIS Student Council | AY 2024 - 2025

- Supported academic programs and student development initiatives.
- Assisted in organizing educational seminars and workshops.

Event Associate

Supreme Student Council | AY 2024 - 2025

- Assisted in organizing institutional events and student activities.
- Coordinated with committees to ensure smooth event execution.

Certifications

IBM	Introduction to Project Management - Completed June 2026
Cisco	CCNA: Introduction to Networks - Completed 2026
Politecnico di Milano	Ethics of Artificial Intelligence - Completed April 2026
Meta	Introduction to Databases - Completed March 2026
4EU+ Alliance	Data Literacy: What Is It and Why Does It Matter? - Completed June 2025
University of California, Irvine	Grammar and Punctuation - Completed May 2025

Competitions and Academic Activities

C# Programming Competition

Mapúa Malayan Colleges Laguna | 2nd Year, 3rd Trimester (2026)

Participated in a school-wide programming competition focused on C# problem-solving, algorithm implementation, debugging, and application development.

Languages

Filipino	Native
English	Fluent
Japanese	Beginner

Soft Skills

Leadership, Team Collaboration, Problem Solving, Critical Thinking, Communication, Adaptability, Time Management, Project Management, Technical Documentation, Presentation Skills, System Analysis and Design

Professional Interests

Full-Stack Web Development, Mobile Application Development, Software Engineering, Database Design and Optimization, Cloud Deployment, API Development and Integration, Real-Time Systems, Information Security, Automation and Productivity Tools, Emerging Technologies
